Blueprint Reading I – Glaziers (4 Hrs.):

In this entry-level blueprint reading class, specifically tailored for glaziers, you will learn the essential skills to navigate blueprints with confidence. We will cover topics such as understanding symbols, interpreting specifications, documents, architectural drawings, and shop drawings. By the end of this course, you will have the knowledge and expertise to read blueprints accurately and contribute to successful glazing installations.

Blueprint Reading II – Glaziers (4 Hrs.):

Building on the foundation of the entry-level class, Blueprint Reading II equips glaziers with advanced techniques to navigate specifications, architectural drawings, and shop drawings. This course also introduces the use of tablets and new technology programs for efficient field labor management in building construction. By the end of the course, glaziers will have enhanced blueprint reading skills, proficiency in utilizing digital tools, and the ability to contribute to successful glazing projects in the digital era.

Hardware – Door Control – Glaziers (4 Hrs.):

This course provides an in-depth exploration of essential skills and knowledge for glaziers and professionals involved in commercial door installations. Participants gain a comprehensive understanding of ADA requirements, choosing the right door closers and hardware, proper mounting techniques, and step-by-step adjustment procedures. The course emphasizes the importance of creating accessible, safe, and efficient entrances in compliance with building codes. Through hands-on activities and practical insights, participants learn how to select, install, and fine-tune door closers for optimal functionality, enhancing the overall user experience.

**Classes with (*) are 2-part courses - must attend both nights/days to complete*

***OSHA 30 is available online only - please contact the
apprenticeship office for details.***

◆ MEMBERS MAY ATTEND ANY CLASS AT ANY LOCATION ◆

!! PRIOR REGISTRATION IS REQUIRED !!
